

AWS Services Reference Sheet

Quick reference list connecting common use cases with their corresponding AWS service.

Use Case / Capability	AWS Service Name
Accelerate app development with GraphQL and Pub/Sub APIs	AWS AppSync
Analyze and debug distributed applications	AWS X-Ray
Analyze and visualize AWS spending	AWS Cost Explorer
Analyze images and video	Amazon Rekognition
Automate application migration to AWS	AWS Application Migration Service (MGN)
Automated security assessment service	Amazon Inspector
Automatic speech recognition	Amazon Transcribe
AWS Application Discovery Service	AWS Application Discovery Service
Batch computing	AWS Batch
Big data processing using Spark and Hadoop	Amazon EMR
Block storage for EC2	Amazon Elastic Block Store (Amazon EBS)
Build a business case for cloud migration	Migration Evaluator
Build and test code with continuous scaling	AWS CodeBuild
Build conversational interfaces and chatbots	Amazon Lex
Build and manage APIs	Amazon API Gateway
Build deploy full-stack web and mobile apps	AWS Amplify
Build, train, and deploy machine learning models	Amazon SageMaker
Central governance and management across AWS accounts	AWS Organizations
Central management of firewall rules	AWS Firewall Manager
Centralized backup across AWS services	AWS Backup
Centralized security and compliance center	AWS Security Hub
Centrally manage SSO access to multiple AWS accounts	AWS IAM Identity Center
Comprehensive cost and usage data records	AWS Cost and Usage Reports
Connect devices to the cloud	AWS IoT Core
Connect on-premises networks to AWS	AWS Site-to-Site VPN
Connect VPCs and on-premises networks	AWS Transit Gateway
Continuous integration and continuous delivery service	AWS CodePipeline
Continuously audit AWS usage to simplify risk and compliance	AWS Audit Manager
Convert database schemas for migration	AWS Schema Conversion Tool (AWS SCT)
Create and manage cryptographic keys	AWS Key Management Service (AWS KMS)
Create and use standardized IT services	AWS Service Catalog
Dedicated network connection to AWS	AWS Direct Connect
Desktop application streaming service	Amazon AppStream 2.0
Discover and protect sensitive data at scale	Amazon Macie
Discover insights and relationships in text	Amazon Comprehend
Easy-to-use virtual private servers with fixed monthly pricing	Amazon Lightsail
Establish secure connections to your AWS network	AWS VPN

Use Case / Capability	AWS Service Name
Extract text and data from documents	Amazon Textract
Fast and flexible NoSQL database	Amazon DynamoDB
Fast, simple, and cost-effective data warehousing	Amazon Redshift
Find, buy, and deploy software that runs on AWS	AWS Marketplace
Fully managed container registry	Amazon Elastic Container Registry (Amazon ECR)
Fully managed document database compatible with MongoDB	Amazon DocumentDB
Fully managed graph database	Amazon Neptune
Fully managed message queuing for microservices	Amazon Simple Queue Service (Amazon SQS)
Fully managed pub/sub messaging and notifications	Amazon Simple Notification Service (Amazon SNS)
Fully managed virtual desktops	Amazon WorkSpaces
Generative AI-powered assistant for businesses	Amazon Q
Global content delivery network	Amazon CloudFront
Hardware-based key storage for regulatory compliance	AWS CloudHSM
High-performance managed relational database	Amazon Aurora
High-scale inbound and outbound cloud email	Amazon Simple Email Service (Amazon SES)
Highly accurate enterprise search powered by ML	Amazon Kendra
Highly secure, reliable, and scalable container execution	Amazon Elastic Container Service (Amazon ECS)
Host and manage Active Directory	AWS Directory Service
Hybrid cloud storage with local caching	AWS Storage Gateway
Identify optimal AWS compute resources	AWS Compute Optimizer
Identity management for web and mobile apps	Amazon Cognito
Improve application availability and performance	AWS Global Accelerator
In-memory caching service for Redis and Memcached	Amazon ElastiCache
Infrastructure as code service	AWS CloudFormation
Interactive query service for S3 using SQL	Amazon Athena
Investigate potential security issues	Amazon Detective
Isolated cloud resources	Amazon VPC
Launch, run, and scale feature-rich file systems	Amazon FSx
Low-cost archive storage	Amazon S3 Glacier
Managed DDoS protection	AWS Shield
Managed file storage for EC2	Amazon Elastic File System (Amazon EFS)
Managed Kubernetes service	Amazon Elastic Kubernetes Service (Amazon EKS)
Managed relational database service	Amazon RDS
Managed threat detection service	Amazon GuardDuty
Migrate databases with minimal downtime	AWS Database Migration Service (AWS DMS)
Monitor resources and applications	Amazon CloudWatch
Natural and fluent language translation	Amazon Translate
Object storage built to retrieve any amount of data	Amazon S3

Use Case / Capability	AWS Service Name
Omnichannel cloud contact center	Amazon Connect
On-demand access to compliance reports	AWS Artifact
Operational hub for AWS resources	AWS Systems Manager
Optimize performance and security	AWS Trusted Advisor
Physical devices to migrate data into and out of AWS	AWS Snow Family
Process and analyze streaming data in real-time	Amazon Kinesis
Provision, manage, and deploy SSL/TLS certificates	AWS Certificate Manager (ACM)
Review and improve workloads	AWS Well-Architected Tool
Rotate, manage, and retrieve secrets	AWS Secrets Manager
Run and manage web apps	AWS Elastic Beanstalk
Run AWS infrastructure on-premises	AWS Outposts
Run code without thinking about servers	AWS Lambda
Scalable and cost-effective disaster recovery	AWS Elastic Disaster Recovery
Scalable BI and data visualization	Amazon QuickSight
Scalable domain name system service	Amazon Route 53
Scale resources to meet demand	AWS Auto Scaling
Search, analyze, and visualize log data	Amazon OpenSearch Service
Secure and resizable compute capacity in the cloud	Amazon EC2
Secure browser access to internal websites	Amazon WorkSpaces Secure Browser
Securely access AWS resources from any location	AWS Client VPN
Securely access services hosted on AWS	AWS PrivateLink
Securely manage access to services and resources	AWS Identity and Access Management (IAM)
Serverless compute for containers	AWS Fargate
Serverless data integration and ETL	AWS Glue
Serverless event bus for event-driven apps	Amazon EventBridge
Set custom budgets and receive alerts	AWS Budgets
Set up and govern a secure multi-account environment	AWS Control Tower
Share AWS resources simply and securely	AWS Resource Access Manager (AWS RAM)
Technical support and guidance for AWS	AWS Support
Track, manage, and control software licenses	AWS License Manager
Track migrations from a single place	AWS Migration Hub
Track resource inventory and changes	AWS Config
Track user activity and API usage	AWS CloudTrail
Turn text into lifelike speech	Amazon Polly
Unified tool to manage AWS services	AWS CLI
View and manage service quotas	Service Quotas
View service health and operational issues	AWS Health Dashboard
Visual workflow service to orchestrate AWS services	AWS Step Functions
Web application firewall	AWS WAF
Web-based interface to manage AWS	AWS Management Console
